

## MathClassExample

```
package by.riit.chapter12;
```

```
/**
 * пример выражения
 *  $y = a*a * \sin(x) - b * \exp(-a)$ 
 */
public class MathClassExample {
    public static void main(String[] args) {
        int a = 3;
        double b = 34.789;
        double x = 12.3;

        double y = Math.pow(a, 2) * Math.sin(x) - b * Math.exp(-a);
        System.out.println("y = " + y);
    }
}
```
