

## A Test Driver Program: TestLine.java

```
1  package by.riit.chapter12;
2
3  /**
4   *
5   */
6  // Управляющая программа для Line class
7  public class TestLine {
8      public static void main(String[] args) {
9          Line l1 = new Line(0, 3, 4, 0);
10         System.out.println(l1);    // toString()
11         System.out.println(l1.getLength());
12
13         l1.setBeginXY(1, 2);
14         l1.setEndXY(3, 4);
15
16         System.out.println(l1);
17
18         Point p1 = new Point(3, 0);
19         Point p2 = new Point(0, 4);
20         Line l2 = new Line(p1, p2);
21
22         System.out.println(l2);
23         System.out.println(l2.getLength());
24
25         l2.setBegin(new Point(5, 6));
26         l2.setEnd(new Point(7, 8));
27
28         System.out.println(l2);
29     }
30 }
```
