

TestImageIcon

```
package by.riit.gui_basics;

import javax.swing.*;
import java.awt.*;

/**
 * размещение картинок на JButton
 * картинки разных форматов в папке image
 */

public class TestImageIcon extends JFrame {
    private ImageIcon rbIcon = new ImageIcon("image/rb.jpg");
    private ImageIcon ruIcon = new ImageIcon("image/ru.jpg");
    private ImageIcon frIcon = new ImageIcon("image/fr.gif");
    private ImageIcon markaIcon = new ImageIcon("image/pic.jpg");

    public TestImageIcon() {
        setLayout(new GridLayout(1, 4, 5, 5));
        add(new JLabel(rbIcon));
        add(new JLabel(ruIcon));
        add(new JButton(frIcon));
        add(new JButton(markaIcon));
    }

    public static void main(String[] args) {
        TestImageIcon frame = new TestImageIcon();
        frame.setTitle("TestImageIcon");
        frame.setSize(1400, 200);
        frame.setLocationRelativeTo(null);
        frame.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE);
        frame.setVisible(true);
    }
}
```
